

Plant passport :GB145324

Brief Cacti care: Barney plants general guide only -UK growers.

Best grown in a sunny position – But good circulation when it's HOT yes, they can burn!

And FROST protection is needed this varies but is above 6° C, generally.

Rot can set in easily – compost should be open and gritty *

No excessive watering, only from March to September, once a week keep dry outside these months.

Enjoy and love your plants, high potash feed every other watering.

You and they are worth it!
